```
public int majorityElement(int[] nums) {
    int count=0, majority=0;
    for(int i=0; i<nums.length; i++){
        if(count==0){
            majority=nums[i];
            count++;
        }
        else if(nums[i]==majority) count++;
        else count--;
    }
    return majority;
}
```

↳ Boyer - Moore's majority vote algorithm

Kadane's Algorithm.

```
public int maxSubArray(int[] nums) {
    int maximum_sum = nums[0];
    int curr_sum = nums[0];
    for (int i = 1; i < nums.length; i++) {
        curr_sum = Math.max(curr_sum + nu
```

```
ms[i],nums[i]);
        maximum_sum=Math.max(maximum_
sum,curr_sum);
    }
    return maximum_sum;
}
```
