

Q. find the second largest element in an array.

↳ eg:- $[1, 2, 3, 4, 9, 14, 12]$

```
int max = Integer.MIN_VALUE;
int sec_max = 1;

for (int i = 1; i < n; i++) {
    if (arr[i] > max) {
        sec_max = max;
        max = arr[i];
    }
    else if (arr[i] < max && arr[i] > sec_max) {
        sec_max = arr[i];
    }
}

return sec_max;
```

Q. find whether the array is sorted or not?

$[2, 3, 4, 5, 6, 7]$ → ans → true

```

bool sorted = true;
for (int i = 0; i < n - 1; i++) {
    if (arr[i] > arr[i + 1]) {
        sorted = false;
        break;
    }
}

```

Sort (sorted);

Q. calculate the prefix & suffix sum array

arr = [1, 2, 3, 4, 5]

prefix = [1, 3, 6, 10, 15]

suffix = [15, 14, 12, 9, 5]
