```
class Solution {
    public void reverse(int []nums,int i,int j){
        while(i<j){
            int temp=nums[j];
            nums[j]=nums[i];
            nums[i]=temp;
            i++;
            j--;
        }
    }
    public void nextPermutation(int[] nums) {
        int n=nums.length;
        int i=n-1;
        while(i>0&& nums[i-1]>=nums[i]){
            i--;
        }
        if(i==0){
            reverse(nums,0,n-1);
        }
        else{
            int j=n-1;
            while(j>=i&&nums[j]<=nums[i-1]){
                j--;
            }
            int temp=nums[j];
            nums[j]=nums[i-1];
            nums[i-1]=temp;
            reverse(nums,i,n-1);
        }
    }
}
```
