

→ [1, 2, 3, 3, 4, 5]

↳ Sorted (ascending)

1 element is duplicate

↳ return the duplicate element

Count the duplicate.

Remember

↳ If the array is sorted then the repeating numbers would be consecutive.

int count = 0;

for (int i = 0 → arr.length - 1; i++) {

→ if (arr[i] == arr[i+1]) count++;

}
